## Wire Gauze Type Packing

H&MT Wire Gauze Packing is a fabric woven from fine-diameter wire. The H&MT Wire Gauze Packing is the preferred packing in distillation service for vacuum and low liquid rate applications. Low pressure drop per theoretical stage makes wire gauze packing the preferred device for processing specialty chemicals, pharmaceuticals and temperature sensitive materials. Generally, it is used in small to medium diameter columns to achieve maximum number of theoretical stages in minimum column height. Three types of H&MT Wire Gauze Packing are available: HMT-AX, HMT-BX and HMT-CY.

## Metal Corrugated Sheet Type Packing

H&MT Corrugated Structured Packing are fabricated from thin, corrugated (crimped) metal sheets, arranged in parallel to each other. Surface of the corrugated sheets can be grooved, lanced, textured or smooth. The corrugated sheets are perforated and usually assembled into an element 8 to 12 inch tall.

Sr No	Type	Nominal Inclination Angle	Surface Area m <sup>2</sup> /m <sup>3</sup>
1	HMT-125 Y/X	45\60	125
2	HMT-220 Y/X	45\60	220
3	HMT-250 Y/X	45\60	250
4	HMT-350 Y/X	45\60	350
5	HMT-500 Y/X	45\60	500
6	HMT-700 Y/X	45\60	700
